## Professional Summary

Node.js developer passionate about backend engineering, RESTful API development, and scalable server-side applications. Experienced with the MERN stack and building real-world web apps from the ground up. Strong in problem-solving and always eager to learn and contribute to impactful tech solutions. Currently seeking backend development roles where I can leverage my skills in Node.js, Express, and MongoDB.

---

### Technical Skills

- **Languages & Frameworks:** JavaScript, Node.js, Express.js, React.js, Java
  - **Databases:** MongoDB, MySQL
  - **Tools:** Git, GitHub, VS Code, Postman
  - **Certifications:** Software Engineering (NPTEL), Introduction to Cyber Security (Cisco), Data Analytics with Python (NPTEL)
  - **Soft Skills:** Team collaboration, Problem-solving, Agile development, Time management
- 

## Education

### B.Tech in Computer Science Engineering

Parul Institute of Technology, Vadodara, Gujarat

*Expected Graduation: June 2025*

### High School (71.6%)

S.N. Sinha College, Warsaliganj, Bihar

*Completed: July 2021*

---

## Professional Experience

### Node.js Developer Intern

*Instance IT Solutions (On-Site) | Dec 2024 – Feb 2025*

- Supported the backend development team in identifying and fixing critical bugs.
- Developed and optimized RESTful APIs to improve application performance.
- Contributed to the stability and scalability of backend systems in production.

## **Frontend Developer Intern**

*Skill Valley (Remote) | March 2023 – June 2023*

- Designed and implemented responsive React.js UI with TailwindCSS for a web application.
  - Improved website performance by 15% by optimizing component structures.
  - Ensured cross-browser compatibility and mobile responsiveness across devices.
- 

## **Projects**

### **Grocery Delivery App**

[GitHub Repo](#) | Team Size: 4

- Developed a MERN stack-based platform for ordering groceries online with home delivery.
- Built RESTful APIs using Express.js and integrated MongoDB for real-time product data handling.
- Implemented search, filter, and user-friendly UI for smooth user experience.

### **TextUtils Web App**

[GitHub Repo](#) | Solo Project

- Created a React-based text utility tool offering case conversion, word/character count, and reading time estimation.
- Enhanced productivity for users working with text formatting and analysis.

### **SafarSang – Travel Explorer App**

[GitHub Repo](#) | Solo Project

- Built a full-stack travel platform showcasing curated tour packages and booking customization.
  - Implemented user journeys including tour discovery, custom itinerary planning, and hotel/transport partner integration.
  - Advocated responsible tourism with community-oriented design elements.
-
