PROFESSIONAL SUMMARY

Backend-focused software engineer with experience building scalable B2B systems at Swiggy. Skilled in Node.js, PostgreSQL, and system design, with a strong focus on designing reliable and high-performance architectures. Hands-on experience with AWS services like SQS and S3, along with frontend exposure using Angular. Passionate about solving real-world problems through clean and efficient engineering.

TECHNICAL SKILLS

Languages & Frameworks:	JavaScript, Node.js, Express.js, React.js, Angular
Databases:	PostgreSQL, MongoDB, MySQL
Cloud & Tools:	AWS (SQS, S3), Git, GitHub, VS Code, Postman
Certifications:	Software Engineering (NPTEL), Introduction to Cyber Security (Cisco), Data Analytics with Python (NPTEL)
Soft Skills:	Team collaboration, Problem-solving, Agile development, Time management

EDUCATION

2021 – 2025	B.Tech in Computer Science Engineering , Parul Institute of Technology, Vadodara, Gujarat <i>Completed: June 2025</i>
2019 – 2021	High School (71.6%) , S.N. Sinha College, Warsaliganj, Bihar <i>Completed: July 2021</i>

PROFESSIONAL EXPERIENCE

Executive Process Automation Engineer — Swiggy	Nov 2025 – Present
- Developed and maintained backend services using Node.js and Express.js for internal B2B applications. - Designed and optimized PostgreSQL database schemas and queries for efficient data handling. - Built scalable systems with strong focus on system design, architecture, and reliability. - Contributed to frontend development using Angular for full-stack feature delivery. - Utilized AWS services like SQS and S3 for asynchronous processing and storage solutions. - Automated workflows to improve operational efficiency and reduce manual effort.	

Freelance Projects — Zexgen (Nano Split)

- Contributed to the design and development of user interfaces for **Nano Split**, focusing on usability and intuitive user experience. [Link](#)
- Translated product requirements and design concepts into responsive and user-friendly UI components.
- Collaborated closely with backend and product teams to ensure seamless integration of frontend features.
- Improved UI consistency and responsiveness across different screens and devices.

Freelance Projects — E-commerce Platform

- Contributed to backend development of an e-commerce platform [Link](#) as part of a team.
- Designed and implemented scalable database schemas for product, order, and user management using PostgreSQL.
- Developed and optimized RESTful APIs to handle core business logic and improve system performance.
- Collaborated across teams to ensure efficient integration between backend services and frontend components.

Software Developer Intern — ByteXL (Hybrid)

Jul 2025 – Oct 2025

- Architected and built a robust 4-tier backend using Node.js, Express, and TypeScript to ensure maintainability.
- Integrated Elasticsearch to build a high-performance search API with full-text search and complex aggregations.
- Implemented a complete authentication system with JWT access/refresh tokens and middleware authorization.
- Containerized the development environment using Docker Compose for consistency across the team.
- Built a resilient SQS listener for asynchronous job orchestration and machine-to-machine communication.

Node.js Developer Intern — Instance IT Solutions (On-Site)

Dec 2024 – Feb 2025

- Supported the backend team in identifying and fixing critical bugs.
- Developed and optimized RESTful APIs to improve performance and scalability.
- Contributed to the stability and reliability of backend systems in production.

PROJECTS

Grocery Delivery App | [Link](#)

Team Size: 4

Developed a MERN stack-based platform for ordering groceries online. Built RESTful APIs using Express.js and integrated PostgreSQL for real-time data handling. Implemented search, filter, and a user-friendly UI for smooth experience.

TextUtils Web App | [Link](#)

Created a React-based text utility tool offering text transformations, word/character count, and reading time estimation. Improved productivity for users working with content editing.

SafarSang – Travel Explorer App | [Link](#)

Built a full-stack travel platform showcasing curated tour packages with booking customization. Implemented tour discovery, itinerary planning, and partner integrations for hotels and transport.

HOBBIES

Building side projects, Fitness, Singing
